

National Listing Workplan
FY17 Workload (September 2016 Version)

Key to Action Types- 12M: 12-month finding on a petition to list a species. If listing is warranted, we generally intend to proceed with a concurrent proposed listing rule and proposed critical habitat designation, if critical habitat is prudent and determinable.

Discretionary Status Review: Status review undertaken by discretion of the Service. Results of the review may be to propose listing, make a species a candidate for listing, provide notice of a not warranted candidate assessment, or other action as appropriate.

Proposed Listing Determination: For species that are already candidates for listing, a proposed listing determination would either propose the species for listing or provide notice of a not warranted finding. We generally intend to propose critical habitat designations concurrent with proposed listing rules, to the extent prudent and determinable.

Potential Final Listing Determination: For candidates with Proposed Listing Determinations still forthcoming in FY16, this is a placeholder for the Final Listing Determination, in the event the species is proposed.

Final Listing Determination: For species that have already been proposed for listing, the final listing determination would either finalize or withdraw the proposed listing rule. We generally intend to finalize critical habitat designations concurrent with final listing rules, to the extent prudent and determinable.

PCH: Proposed critical habitat rulemaking when not concurrent with a proposed listing rule.

FCH: Final critical habitat rulemaking for previously proposed critical habitat.

rPCH: Revised proposed critical habitat for previously proposed, but not finalized, critical habitat needing revision.
